His magnificence Rector of the Jan Kochanowski University in Kielce,
Prof. of Medical Sciences Jacek Semaniak Ph.D. Habilitated

Your Magnificence, Dear Rector,

On behalf of myself and University Commission for the Quality of Education in the Field of Medicine I would like to express my thanks to University Authorities, Faculty Authorities and the Teams for the Preparation and Approval of the Annual Report for a nice welcome we received and the time we spent together during the evaluation visit.
After studying the data provided by the University in the questionnaire “Annual Inspection Report” and the information obtained during the evaluation visit at the Jan Kochanowski University in Kielce on that 30th day of may 2016 the Commission positively assesses the educational process at the Faculty of Medicine and Health Sciences.

The strengths of the evaluated field of studies:
1) the University concluded agreements with each hospital and clinic providing education to students with the obligations of both parties defined.

2) the Faculty of Medicine and Health Sciences has a proper infrastructure to ensure the achievement of objectives and educational effects, which means that teaching and clinical facilities match the specific nature of the field and mode of studies and guarantee full achievement of educational goals. The Faculty of Medicine and Health Sciences adopted the Resolution on recruitment of foreign students.

Resolution no 21/2016 of the Senate of the Jan Kochanowski University in Kielce specifying the conditions and principles of recruitment of foreign students (from USA and Canada) for part-time studies in the field of Medicine run in the English Language, in the academic year 2016/2017, (Appendix 20).

3) it is worth mentioning that the University provides a sufficient number of teaching staff whose professional qualifications allow for the achievement of all educational goals specified in the programme of studies and a sufficient number of the administrative staff whose professional qualifications satisfy the University’s needs related to education, research, medical activity as well those expressed by students and staff.

At the same time the Commission RECOMMENDS:

1) development of procedures and regulations to deal with student complaints and appeal,
2) development and implementation of a system preventing the conflict of personal and professional interests of a teaching staff,
3) regarding the implementation of programme of studies the activities allowing for the maintenance of high educational standards both for the studies run in the Polish and English Language should be continued,
4) it is advisable to appoint a Faculty Commission to develop detailed procedures and to deal with complaints relating to teacher-student relations, mobbing, and other irregularities that may arise.

Please kindly read the aforesaid comments.
Attn.
Prof. of Medical Sciences Stanisław Głuszek, Ph.D.Habilitated, Dean of the Faculty of Medicine and Health Sciences of the Jan Kochanowski University in Kielce.

Yours faithfully,
