

DESCRIPTION OF THE COURSE OF STUDY

Course code	0917LEK-B2.3-C	
Name of the course in	Polish	Chemia
	English	Chemistry

1. LOCATION OF THE COURSE OF STUDY WITHIN THE SYSTEM OF STUDIES

1.1. Field of study	medicine
1.2. Mode of study	Full-time
1.3. Level of study	Uniform Master's study
1.4. Profile of study*	General academic
1.5. Specialization*	lack
1.6. Unit running the course of study	Faculty of Mathematics and Natural Sciences
1.7. Person/s preparing the course description	dr Dariusz Widel
1.8. Person responsible for the course of study	dr Dariusz Widel
1.9. Contact	dariusz.widel@ujk.edu.pl

2. GENERAL CHARACTERISTICS OF THE COURSE OF STUDY

2.1. Affiliation with the module	Scientific basis of medicine
2.2. Language of instruction	English
2.3. Semesters in which the course of study is offered	1st
2.4. Prerequisites*	Knowledge of general chemistry, inorganic and organic at the advanced level of secondary school.

3. DETAILED CHARACTERISTICS OF THE COURSE OF STUDY

3.1. Form of classes	lecture– 15 hours; laboratory classes– 20 hours	
3.2. Place of classes	Courses in the teaching rooms of the UJK The Faculty of Mathematics and Natural Sciences, The Institute of Chemistry	
3.3. Form of assessment	Laboratory-credit with grade, written exam	
3.4. Teaching methods	Informative lecture, explaining and problem-based, laboratory classes	
3.5. Bibliography	Required reading	An Introduction to General, Organic, and Biological Chemistry, Global Edition Autor: Timberlake Karen, ed. by Pearson Higher Education , 2015
	Further reading	John E. McMurry - Organic Chemistry - 8th edition in pdf

4. OBJECTIVES, SYLLABUS CONTENT AND INTENDED TEACHING OUTCOMES

<p>4.1. Course objectives (including both forms of classes)</p> <p>C1- Mastering the basic knowledge in the field of general, analytical and organic chemistry.</p> <p>C2 - Understanding the properties of inorganic and organic compounds important in biochemistry.</p> <p>C3 - Conducting chemical calculations and interpretation of the results of conducted experiments.</p> <p>C4 - Mastering the basics of work in a chemical laboratory and elements quantitative analysis of organic and inorganic compounds.</p> <p>C5- Development of proper ethical attitudes and abilities to properly communicate.</p>
<p>4.2. Detailed syllabus</p> <p>Lecture</p> <p>The water in the human body. The structure and chemical properties of water. The influence of dissolved substances on the properties of the solutions. Diffusion and osmosis. The osmolarity and tonicity. The Donnan equilibrium. Acid-base balance. The concentration of hydrogen ions, the pH concept. Buffer solutions and function. Henderson-Hasselbalch equation. Buffer capacity. Elements of classical quantitative analysis. Functional groups of organic compounds and nomenclature. Tautomerism. The importance of stereochemistry relates to properties of organic compounds. Chiral molecules. Aromatic hydrocarbons and some their derivatives of biological importance. Amino acids and proteins: structure and classification, physicochemical properties, isoelectric point, peptide bond. Carbohydrates: classification, the chemical properties of monosaccharides, types of isomerism. Some sugar derivatives of biological importance. Lipids: fatty acids – structure and terminology, Triacylglycerols. The heteroaromatic compounds of five and six membered rings with one and two and heteroatoms. The nitrogenous bases: structure and importance in biochemistry.</p>

Laboratory

Practical classes related to selected methods of quantitative analysis, simple chemical measurements, and experiments in organic chemistry laboratory. Qualitative analysis of biologically important cations and anions. Acid-base titration. Spectrophotometric determination of protein. Properties of buffer mixtures. Thin-layer chromatography (TLC) of plants' colorants.

4.3. Education outcomes in the discipline

Code	A student, who passed the course	Relation to teaching outcomes
within the scope of KNOWLEDGE:		
W01	knows basic reactions of organic and non-organic compounds in water solutions	B.W4.
W02	knows the structure of simple organic compounds in living organisms	B.W10.
W03	describes the structure and properties of aminoacids and carbohydrates	B.W11.
W04	describes stereochemistry of organic compounds and their importance in biochemistry	B.W12.
within the scope of ABILITIES:		
U01	determines molar and percentage concentration of compounds and the concentration of substances in isoosmotic solutions, both mono- and multi-component	B.U3.
U02	determines the pH of the solution and the effect of changes in the pH on the inorganic and organic compounds;	B.U5.
U03	use databases, including online ones, and search for necessary information using available tools	B.U11

4.4. Methods of assessment of the intended teaching outcomes

Teaching outcomes (code)	Method of assessment (+/-)																				
	Exam oral/written*			Test*			Project*			Effort in class*			Self-study*			Group work*			Others (lab. reports)*		
	Form of classes			Form of classes			Form of classes			Form of classes			Form of classes			Form of classes			Form of classes		
	L	C	...	L	C	...	L	C	...	L	C	...	L	C	...	L	C	...	L	C	...
W01	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
W02	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
W03	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
W04	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
U01	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
U02	+	-		-	+		-	-		+	+		+	+		-	+		-	+	
U03	-	-		-	-		-	-		+	+		+	+		+	-		-	+	

4.5. Criteria of assessment of the intended teaching outcomes

Form of classes	Grade	Criterion of assessment
lecture (L)	3	Achievement 61 - 68% of the total number of points from written exam.
	3,5	Achievement 69 - 76% of the total number of points from written exam
	4	Achievement 77 - 84% of the total number of points from written exam.
	4,5	Achievement 85 - 92% of the total number of points from written exam.
	5	Achievement 93 - 100% of the total number of points from written exam.
classes (C)*	3	Accomplishment of laboratory classes and achievement 61-68% of the total number of points from written partition tests.
	3,5	Accomplishment of laboratory classes and achievement 69-76% of the total number of points from written partition tests.
	4	Accomplishment of laboratory classes and achievement 77-84% of the total number of points from written partition tests.

	4,5	Accomplishment of laboratory classes and achievement 85-92% of the total number of points from written partition tests.
	5	Accomplishment of laboratory classes and achievement 93-100% of the total number of points from written partition tests.

5. BALANCE OF ECTS CREDITS – STUDENT’S WORK INPUT

Category	Student's workload
	Full-time studies
NUMBER OF HOURS WITH THE DIRECT PARTICIPATION OF THE TEACHER /CONTACT HOURS/	35
<i>Participation in lectures*</i>	15
<i>Participation in classes, seminars, laboratories*</i>	20
<i>Preparation in the exam/ final test*</i>	
<i>Others*</i>	
INDEPENDENT WORK OF THE STUDENT/NON-CONTACT HOURS/	40
<i>Preparation for the lecture*</i>	
<i>Preparation for the classes, seminars, laboratories*</i>	10
<i>Preparation for the exam/test*</i>	30
<i>Gathering materials for the project/Internet query*</i>	
<i>Preparation of multimedia presentation</i>	
<i>Others*</i>	
TOTAL NUMBER OF HOURS	75
ECTS credits for the course of study	3

Accepted for execution (date and signatures of the teachers running the course in the given academic year)
